

Frank's Quickie Protector

Frank's Quickie Protector is designed and built "in house" to ensure that our customers receive the highest quality product in the industry.

The Quickie Protector has no protruding objects on the outside that can be damaged when the protector is on the pipe. The gripping mechanism has a combination of hard material and soft inserts to give the protector a great grip, while resisting damage.

Frank's Quickie Protector is available in sizes ranging from 5" to 20".
